

Live Stream More with Endeavourcom

Live Streaming is your perfect solution to reach beyond the room and to engage with a wider audience right now. Let's face it, who wants to wait for a recording?

“ Endeavourcom do a very good job, and offers good value for money. When we first contacted them, there was no dodgy marketing or persuading. They made it simple - this is what we can do and this is how much it costs. It was all very upfront and straightforward. They switched our live streaming service, which saved us £120 a month, and their digital phone solution has meant further savings. Sometimes they're very busy, but if you need something done, Scott manages to find a way to make it happen. They are very, very responsive and efficient. They never sell you things you don't want or don't need.

You may be organising:

- Webinars
- Conferences
- Religious services and ceremonies
- Memorials
- Launch events
- Sporting events
- Concerts
- Social media events

This is your opportunity to broadcast to the wider community, to multiple remote locations, even globally. You are no longer restricted to broadcasting a message only to the people sitting in front of you, or reliant on a video recording that needs to be edited and distributed later. Now, you can communicate with your whole audience, live! Whether that is 5 people or 5,000.

Already using a live streaming service? We may be able to repurpose your existing camera(s) and switch your service to a more cost-effective solution, offering you multiple opportunities to save money.

How and Where Live Streaming Works

We provide professional high definition CCTV cameras linked to an audio system to capture both images and sound of your event, giving you a reliable, seamless solution, whether you're broadcasting from a church, a hall or a boardroom.

Our cameras then stream live to bespoke broadcast platforms or directly to social media platforms such as YouTube, Facebook, etc.

Places of worship, business offices, conference and training centres, community halls and sports facilities – almost any building can be prepared and equipped to allow for live streaming.

Where necessary, we will include features such as password protection, allowing secure access to the live streaming. Protecting the streaming may open up the possibility for you to monetise your event streaming, with pay-per-view or subscriptions.

Why Choose Endeavourcom?

Easy to Use: Once installed, there is no need for additional equipment or personnel to operate the system. It is entirely 'hands-free' for you. There is no need for technical staff on site or complicated technology.

Custom Technology: We offer a range of cost-effective services, tailored specifically for your needs. We take the time to understand the event you are hosting, who will be watching, and why live streaming will make the difference.

Reliable Support: From the initial planning of your streaming setup to ongoing support, we're with you every

step of the way. Organising an event can mean countless tasks - let us take the stress out of the broadcasting.

Experience: Our team has provided high quality technology and communication services for over 20 years, and we work tirelessly to provide the best service to our customers.

Putting Customers First

Corpus Christi Catholic Church in Covent Garden, London, contacted us to help with their live streaming services. Live streaming enables them to stay in touch with worshippers who are unable to attend the church and want to feel part of the congregation.

We were able to save them money by switching their paid subscription to a free YouTube channel, with no loss in quality and the added advantage of being searchable across the internet. They have the option to make some services private and to raise funds from 'paid for' services, should they ever choose to.

Our ongoing maintenance plans cover replacement parts, and we can react quickly to issues, limiting any disruption to their live streaming.

If you are planning an important event or you run regular events, contact our team today to discuss how we can support you.
